Javascript Validator

Use Online Javascript Validator to validate javascript code and find errors and warnings of your code that can be fixed. See real time code validation and fix errors and warnings of your code as you type. After coding is complete, format your javascript code.

```
79         - finally, attach this function to the "change-duration" pseudo-button, so it runs whenever the button is clicked.
80   */
81
82   // INSERT YOUR CODE HERE
83   let durationButton = document.getElementById("duration-button");
84
85   function changeDuration() {
86       let durationText = document.getElementById("duration-text");
87       let newDuration = prompt("Enter the new duration in days:");
88
89       if (!isNaN(newDuration) && newDuration !== null) {
90           duration = parseInt(newDuration);
91           durationText.innerHTML = duration;
92           recalculate();
93       } else {
94           alert("Please enter a valid number.");
95       }
96   }
97
98   durationButton.addEventListener("click", changeDuration);
99
100  // Initial calculation
101  recalculate();
102
```
